Notas:
(1) Datos de Cuentas Nacionales del BCCR
(2) La discontinuidad observada en 1996 y 1997 se debe a cambios en la base de cálculo de cuentas nacionales a partir de 1997. Esto significó una reducción grande en el porcentaje asignado al sector primario. Los datos para esos mismos años sin el ajuste en cuentas nacionales fueron respectivamente de 19 y 18% para 1996 y 1997.
